**Sterile Processing Platform, oneSOURCE, Creates Free Database to Address COVID-19 Pandemic**

*Healthcare facilities will receive complimentary access to segmented database with IFUs specifically for respiratory equipment and reusable surgical gowns*

SALT LAKE CITY, UTAH (March 31, 2020) - Today, [oneSOURCE](#), a leading healthcare management solution, announced a new database to assist healthcare professionals during the COVID-19 (novel coronavirus) pandemic. The [COVID-19 database](#) will be available to new and current users at no cost and will feature tools that include instructions for use (IFUs) to help protect healthcare workers, reduce community spread and maintain patient safety related to ventilators, respirators, bypass machines, and reusable surgical gowns.

“With healthcare facilities in the midst of a crisis, infection control and proper sterile processing practices are of the utmost importance to managing COVID-19. The implementation of a platform like oneSOURCE will increase efficiency and provide healthcare workers with the tools they need to successfully decrease the spread of COVID-19,” said Jack Speer, co-founder and president of oneSOURCE. “This free e-library will be continuously updated and support those on the frontlines to get the information they need to manage any potential growth of the virus from equipment and protective gear as quickly as possible. These are unprecedented times and we’re working diligently with our partners to help manage this global emergency through preventative measures and continue to facilitate the demands of our industry during this critical time.”

Along with featuring key IFUs, the complimentary COVID-19 database will also include vital information regarding ventilators, bypass machines, respirators, surgical gowns and other related equipment that is being used to create safer environments for both patients and medical professionals. oneSOURCE users will also receive free tutorials on how to use the platform and up-to-date information about the COVID-19 crisis.

“Tools like oneSOURCE are imperative when it comes to providing healthcare workers with the resources to fight diseases like COVID-19,” said Heather Thomas, CMO and executive VP of sales and marketing of oneSOURCE. “We recognize the severity and struggle our world is facing and felt it was our responsibility to arm those on the frontlines of this medical crisis with ways to effectively execute their duties in the safest way possible. As we continue to use our platform’s key benefits to address the concerns and needs of our industry, building a database that provides biomedical and sterile processing professionals with the materials necessary to do so was a top priority to our team.”

oneSOURCE has a track record of using its platform to address the needs of the medical industry and provide the proper tools to promote the highest level of patient safety. As a resource for top healthcare organizations such as Mayo Clinic, Sutter Health, VHA and HCA, the range of databases reaches from facilities maintenance to surgical instruments to dental. oneSOURCE currently dominates the sterile processing market with more than 80 percent saturation. The free, segmented database is available now at [onesourcedocs.com/covid-19-database](https://onesourcedocs.com/covid-19-database) and will be

updated with necessary IFUs for the duration of the pandemic. For more information on becoming a subscriber to the full suite of databases, visit [onesourcedocs.com/contact](https://onesourcedocs.com/contact).
