oneSOURCE Database Launches Improved User Platform with Advanced Search Function and Updated Interface

The elevated portal provides users with comprehensive search function and faster results to aid in superior patient safety

SALT LAKE CITY, UTAH (Oct. 8, 2020) - Today, [oneSOURCE](#), an [RLDatix](#) company and one of the industry's leading healthcare management solutions, announced an enhanced database with faster and more accessible search functionality. Users will have access to four new features including a single search bar, autocomplete suggestions, spelling forgiveness and streamlined card view. Further, oneSOURCE has also completed extensive work on overall site improvements that support search scores / rankings, filters, speed and security and performance.

"As we continue to grow the oneSOURCE platform, incorporating relevant features and improved functionality is key to providing a top-of-the-line user experience," said Jack Speer, president of oneSOURCE. "This new look for our user interface and additional components answer the call from our customers to offer helpful changes that elevate the oneSOURCE database and increase healthcare professionals' ability to offer superior patient safety."

The latest features that users will encounter include an augmented single search bar that eliminates the need to complete multiple search keywords and make dropdown selections. Instead you can now enter a keyword, document name, model number, manufacturer, product category or descriptor in the search and the platform will populate relevant information from all oneSOURCE databases instantly. Other modernized elements include new card views for entries that make the information easy-to-read, spelling forgiveness and autocomplete suggestions. The updates and features are available for all current and future customers and were seamlessly integrated into the platform's traditional functions.

"These improvements ensure healthcare professionals are able to conveniently access timely materials such as IFUs, preventative maintenance manuals, and other critical documents on demand," said Heather Thomas, CMO and executive vice president of sales and marketing of oneSOURCE. "Our database has grown significantly in just the past year and with our new formed partnership with RLDatix, our team is more focused than ever on steadily improving the experience, while continuing to offer the necessary tools for our users."

oneSOURCE has a track record of using its platform to address the needs of the medical industry and provide the proper tools to promote the highest level of patient safety. As a resource for top healthcare organizations such as Mayo Clinic, Sutter Health, VHA and HCA, the range of databases reaches from facilities maintenance to surgical instruments to dental. oneSOURCE currently dominates the U.S. hospital market with more than 80% saturation.
