Leading Healthcare Management Solution oneSOURCE Announces New Safety Data Sheets Database with Access to Easily Searchable Current and Archived Documents

The easy-to-use and extensive library of safety procedural manuals will enhance hazard communication standards for oneSOURCE customers

SALT LAKE CITY, UTAH (Nov. 10, 2020) - Today, [oneSOURCE](#), a leading healthcare management solution, announced its newest database for [Safety Data Sheets \(SDSs\)](#) will support safety officers, sterile processing departments, professionals working in the operating room and more. The new library offers customers unrivaled access to thousands of SDSs, from the latest sheets to an archive of over 30 years worth of critical materials. With a focus on maintaining or exceeding OSHA compliance standards, the database arms safety managers and hospital and surgical staff with 24/7 access to a fully searchable platform of unlimited documents, ensuring the highest level of patient care.

"Here at oneSOURCE, we have a unique opportunity to serve our healthcare customers well by sourcing these important safety data sheets in an easy-to-use and approachable format," said Jack Speer president of oneSOURCE. "Our intention for this new database is to pave the communication and information foundation for our customers in order to allow them to act efficiently and effectively in the case of a hazardous incident."

Safety Data Sheets (SDSs) are used as an industry-wide source to instruct workers on how to mitigate chemical exposure to patients and staff including the safety precautions for handling, storing, and transporting. This new SDS database provides users with unlimited access to thousands of documents at their fingertips in a matter of seconds.

"With the new SDS database we are able to provide healthcare professionals with incredibly important materials that traditionally have been difficult to acquire due to the archaic nature of how they were organized, accessed and stored," said Heather Thomas, CMO and executive VP of sales and marketing of oneSOURCE. "This new offering is the answer to decades of frustration from practitioners. oneSOURCE is committed to continuing to develop platforms that allow our partner facilities to thrive and ensure the wellbeing of patients and staff."

The [SDS database](#) is a necessary addition to the company's extensive product line and enables unlimited usage to safety procedures. Leading healthcare organizations, including Trinity Health, Sutter Health, VHA, and HCA, continue to partner with oneSOURCE as it gains unprecedented traction and demand both domestically and internationally.
